

Medway ULV Routes

We have suspended our ULV Applications for 2009 as of Friday September 11th due to cooler nighttime temperatures as well as lower overall trap collections.

Mosquito surveillance continues. If virus activity is identified in the county (West Nile Virus or Eastern Equine Encephalitis) we may consider additional applications if conditions warrant.

Please check this website regularly for updates.

Otherwise, ULV Applications will resume around Memorial Day, 2010.
