And other exotic pests...

<http://www.massnrc.org/pests>

The website of the Massachusetts Introduced Pests Outreach Project, a collaboration between MA Dept. of Agricultural Resources and UMass Extension aimed at preventing the establishment of exotic, potentially invasive pests (weeds, pathogens, and insects) in the state of Massachusetts.

Visit the website for more information:

- **Sign up for pest alerts**

Receive the latest information on new exotic pest detections in the Northeast via an email listserv.

- **View exotic pest fact sheets**

Picture based pest identification with links to many helpful resources.

- **Report pest sightings on-line**

- **Browse links to resources on invasive species**
